## GRANT SUPPORT

2016 \$10,222 Program Director, .01 FTE  
Funding Source: Academic Support Advisory Committee  
Purpose: To train two trainers to provide Mental Health First Aid  
for students on the Anschutz Medical Campus

## RESEARCH

**Principal Investigator (2019 – current)**

**Co-Investigator (2014 – 2019 with PI Aviva Abosch, MD, PhD)**

COMIRB 14-0554: Reclaim® Deep Brain Stimulation Therapy for OCD

Funding: none

Humanitarian Device Exemption (HDE) to provide deep brain stimulation to patients  
who are severely disabled by OCD that is refractory to conventional therapy

**Faculty Mentor (With PI Sara Williams, MSIII)**

COMIRB 17-616: Medical Student Outreach Survey

Sep 2017 – Sep 2018

Funding: none

# CURRICULUM VITAE

**Rachel A. Davis, MD**

To increase access and utilization of Student Mental Health Services by sending out a twice-yearly survey that asks if students would like to be contacted to schedule an appointment with SMH

## **Faculty Mentor (With PI Claire Koljack, MSIII)**

COMIRB 18-0594: Effect of Anti-Stigma Panel on Students' Mental Health Knowledge, Attitudes, and Intended Behaviors

April 2018 – March 2020

### **Principal Investigator (2018 – 2023)**

COMIRB 17-2002: Medical Student Mental Health

March 2018 – ongoing (planned: 10 years)

Funding: \$4000/year from CU Anschutz Department of Psychiatry

Longitudinal prospective study to measure mental health rating scales in medical students at matriculation and at the end of each year to assess changes during medical school

## **Principal Investigator**

RF1 MH121362 - Gault J, **Davis R**, Saks E (mPI): Leveraging ethical dissension among capacity, beneficence, and justice in clinical trials of neurotherapeutics in the severely disabled: lessons from schizophrenia

Funding Agency: NIH

09/17/2019-08/31/2023

Funding: \$1,640,485.00

The main goal of the project is to address ethical concerns raised from both current and historically controversial psychosurgeries that are driving disparities in accessibility to emerging BRAIN Initiative advanced neurotechnology that require a neurosurgical intervention. We will be characterizing capacity to consent, surgical risk, and disease-related burden on quality of life in subjects with treatment-refractory Parkinson's disease undergoing DBS to guide enrollment of treatment-refractory schizophrenia for a DBS clinical trial planned in the future.

## **Site PI**

COMIRB 16-1060 - Deep Brain Stimulation: Evaluation of clinical metrics

Tractography and OCD-DBS

2022 – ongoing

Funding: none

With Icahn School of Medicine at Mount Sinai (Site PI: Fige M)

The main goal of this research is to identify volume of tissue activated and corresponding neuronal tracts via MRI tractography data from patients who have undergone DBS for OCD at University of Colorado Anschutz, Massachusetts General Hospital, University of Minnesota, and Mount Sinai.

2021 – ongoing

Funding:

## Faculty Mentor

With Thompson J (faculty mentor) and Sieja K (PI)

COMIRB 16-1060

Identifying neurophysiological treatment biomarkers in obsessive-compulsive disorder

January 2023 – January 2024

Funding agency: Boettcher Foundation

Funding: \$5000

The primary goal of this project is to use a recently FDA approved deep brain stimulation (DBS) battery (implanted in 2 patients with OCD on our campus), which has the capability to both stimulate the brain and record neural signals from the brain, to identify distinct brain activity patterns that correlate with unique brain states and pathological experiences in patients with OCD.

## Grants submitted:

**mPI** (Gault J, **Davis R**, and Applebaum P)

Gaining perspective from stakeholders concerning deep brain stimulation and high intensity focused ultrasound ablation clinical trials

2023 - 2026

Funding agency: NIMH R01

Funding requested: \$1,891,549 over four years
