13. GRANT SUPPORT

Research Extramural Funding – Current

14 March 2022 – 31 December 2025 **A mixed-methods study of the nature, extent and consequences of artificial intelligence (AI) for individualized treatment planning in end-of-life and palliative care (EOLPC)**
1R01NR019782-01A1
NIH/NINR
Total Award Amount: \$2,084,336
PI: DeCamp (University of Colorado)
Role: PI, 30% Effort

Millions of Americans could benefit from palliative care to address the physical, psychological, and social effects of severe and chronic illness. Artificial intelligence (AI) - computer-based algorithms that can carry out tasks typically reserved for humans – has the potential to give patients and families more detailed and more accurate information about prognosis than ever before, but whether or how to use this information ethically in support of patient- and family-centered care is unknown. To ensure AI supports high quality end-of-life and palliative care that is consistent with patients’ and families’ beliefs, values, and preferences, this project will identify the benefits and challenges of AI for palliative care and then develop practical guidance for its use.

1 January 2022 – 30 November 2023 **REACH-OUT (Research, Engagement and Action on COVID-19 Health Outcomes via Testing)**
1U01MD017436
NIH/NIMHD
Total Award Amount: \$1,084,336
MPI: DeCamp, Nease, Manson (University of Colorado)
Role: Contact PI, 15% Effort

As the coronavirus disease 2019 (COVID-19) pandemic continues to evolve, testing and contact tracing will remain critical to ongoing prevention of serious illness, death, and the social, economic and other ill-effects of the virus. For millions of Americans living in communities disproportionately affected by COVID-19, testing is essential and yet complicated by social, ethical, and behavioral implications – such as concerns about employment status, privacy, stigma, mistrust, and bias – that can deter testing. This community-based project will engage five communities to design, implement, and evaluate interventions to address these concerns.

1 January 2022 –30 June 2023 **The Chatbot Is In: Ethics and Conversational AI in Health Care**

Greenwall Foundation
Total Cost: \$210,575
PI: DeCamp (University of Colorado)
Role: PI, 15% effort

As artificial intelligence (AI)-based technologies are poised to revolutionize health care, one of the most exciting developments has been the development of “chatbots” – computer programs that simulate conversation with humans. Dr. DeCamp and his team will seek to understand the real-world experiences of patients with chatbots, identify critical ethically-relevant aspects of chatbots that AI developers and policymakers must take into account,

and examine the normative implications of these empirical findings for transparency, autonomy, privacy, trust, and fairness in health care.

1 September 2022 – 31 May 20227 **Decision trajectories of patients at the end of life: An epidemiological exploration of MAID and the impact on caregivers and clinicians**
1 R01 AG079555-01
NIH/NIA
Total Award Amount: \$3,093,168
MPI: Matlock, Fischer
Role: Co-I, 8% Effort

This is a longitudinal cohort study to examine we propose to conduct a longitudinal cohort study of patients who are pursuing MAiD from a national sample as well as their caregivers and clinicians. The first aim is to understand quantitative and qualitative outcomes of seriously ill older and younger persons pursuing MAID and the patient-level factors that are associated with subsequently using MAiD. Then we aim to understand the quantitative and qualitative outcomes of caregivers of older and younger patients pursuing MAiD. Finally we aim to qualitatively examine the attitudes and experiences of clinicians prescribing and caring for patients considering MAiD.

15 September 2020 – 31 August 2024 **Health and Financial Implications of Early-Stage Alzheimer’s Disease and Related Dementias**
1RF1AG069922
NIH/NIA
Total Direct Cost: \$3,037,522
PI: Hersch Nicholas (University of Colorado)
Role: Co-I, 10% Effort

In this project, we study whether and how credit report and banking data could be used to catch early warning signs of ADRD and assess potential ethical concerns from use. Findings from this study will provide the most comprehensive information to date on the prevalence and magnitude of financial losses and elder mistreatment prior to ADRD diagnosis, as well as their impact on spousal health.

Research Extramural Funding – Prior

1 October 2021 – 30 September 2022 **Contract work on ethical issues in contemporary medicine**
American College of Physicians
Total Direct Cost: \$39,268
PI: DeCamp (University of Colorado)
Role: PI, 15% Effort

For this budget period, work included research and writing on determination of death, COVID-19 visitation policies, and other issues.

1 July 2020 –30 June 2022 **Mass Administration of Antibiotics: Reaching Clinical and Community Equipose**

Colorado Community Engagement Alliance Against COVID-19 Disparities (CO-CEAL)

1OT2HL156812-01
NIH/NHLBI
Total Direct Cost: \$570,202
MPI: Nease, Sokol, Gonzalez-Fisher
Role: Co-I, 5% Effort

The goal of this project is to translate information about COVID-19 vaccines and therapeutics into culturally sensitive messaging and materials, using trusted community partners as communication channels for these messages and materials on COVID-19 vaccines, their safety and efficacy.

15 March 2021 – 30
April 2022

Implementation and Effectiveness of Monoclonal Antibodies to Treat High-Risk Outpatients with COVID-19

UL1 TR002535-03S3
NIH/NCATS
Total Cost: \$8,699,359
MPI: Sokol and Ginde (University of Colorado)
Role: Co-I, 10% Effort

The goal of this project is to develop, implement, and evaluate strategies to optimize equitable nMAb access in Colorado and determine the effectiveness and safety of nMAb treatment in high-risk COVID-19 outpatients.

1 October 2020 – 30 September 2021 **Contract work on ethical issues in contemporary medicine**

American College of Physicians
Total Direct Cost: \$35,284
PI: DeCamp (University of Colorado)
Role: PI, 15% Effort

For this budget period, work included research and writing on ethics and business practices in medicine; physician suicide, ethical issues in the determination of death, and COVID vaccine allocation.

1 July 2019 – 30 June 2021 **A Novel Methodology to Explore Bioethics Issues in Physician Aid-in-Dying**

Greenwall Foundation
Total Direct Cost: \$301,257
PI: Campbell (University of Colorado)
Role: Co-Investigator, 10% Effort

Physician aid-in-dying (PAD) is a highly contentious issue in bioethics and health policy today. We aim to develop and test a novel efficient, low cost, anonymous methodology to facilitate bioethics-related physician surveys. This study will result in generalizable findings that bring bioethics into policy and decision-making processes about PAD. As Co-investigator, my role on the project is (a) to ensure analytic rigor for the justice & access questions raised by the study and its findings and (b) to assist with survey design and piloting.

1 October 2020 – 31 March 2021 **Ethics-Informed Decision Making and the Return of College Sports amidst COVID-19**

Greenwall Foundation
Total Direct Cost: \$25,000
PI: Baugh (University of Colorado)
Role: Co-I, 2.5% Effort

In response to the urgent need for ethics-informed guidance on the return to college sport amidst the COVID-19 pandemic, this project will: 1) Produce a guidance document for decision makers in college and 2) Produce a manuscript that will be submitted to a peer-reviewed journal detailing the ethical tensions, practical considerations, and procedural aspects that should be involved in such a decision making process for a broader academic audience.

1 October 2019 – 30 September 2020 **Contract work on ethical issues in contemporary medicine**

American College of Physicians
Total Direct Cost: \$34,476
PI: DeCamp (University of Colorado)
Role: PI, 15% Effort

For this budget period, work included research and writing on ethics and business practices in medicine; physician suicide, and COVID resource allocation, including the creation of CME case content.

1 July 2019 –30 June 2020 **Engaging patients, family members and caregivers in end-of-life and palliative care (EOLPC) research: Addressing the bioethical challenges**
3U2CNR014637-07S2
NIH/NINR
Total Cost: \$155,317
PI: Kutner (University of Colorado)
Role: Co-Investigator, 20% Effort

The delivery of high quality, patient- and family-centered palliative care to the millions of Americans who could benefit from it depends upon research that must be responsive to patients' expressed needs. Involving patients, family members, and caregivers in palliative care research can be difficult because of unique ethical challenges, such as profound illness, impaired decision-making ability/capacity, and existing racial and geographic disparities in palliative care access. To ensure all patients' beliefs, values, and preferences shape palliative care research, this project will identify the ethical challenges researchers, patients, family members, and caregivers face and develop practical ethics guidance to address these challenges.

30 September 2014 – 4 January 2019 **Patient-centered Health Reform: Designing Engagement Interventions for ACOs**

1K08HS023684-01
AHRQ
Total Direct Cost: \$562,306
Role: Principal Investigator, 75% Effort, Notes: Design and conduct of the project

This project proposes an innovative investigation of patient engagement at the system level in accountable care organizations (ACOs), a recent novel health care reform that seeks to reduce costs while improving the quality of care.

1 August 2016- 30 June 2019 **Ethical Issues in Humanitarian Health in Situations of Extreme Violence**

Identification Number: N/A
Research for Health in Humanitarian Crises (R2HC)
Total Direct Cost: N/A
PI: Rubenstein (Johns Hopkins University)
Role: Co-Investigator, 5% Effort + 10% Effort during NCE March-June 2019

This project aims to understand the nature, scope and variety of ethical challenges experienced by humanitarian health organizations in Syria, where violence against civilians and health care workers is chronic and extreme and provide practical guidance for operating in such environments. As Co-investigator I assisted in the design of the qualitative methods and provide bioethics analytic support for the ongoing literature review.

1 July 2018- 4 January 2019 **The Johns Hopkins Study of Social Media Enhanced Care of Depression**
Once Upon a Time Foundation
Total Direct and Indirect Cost: \$1,000,000
Co-PIs: Chisholm and Zandi (Johns Hopkins University)
Role: Co-Investigator, 20% Effort

This project aims to assess whether incorporating social media content improves psychiatric diagnosis and treatment. As Co-Investigator, I assisted in identifying and managing potential ethical and regulatory issues in the project.

1P20HG007261-01

NIH/NHGRI

Johns Hopkins Berman Institute of Bioethics

Total Direct Cost: N/A

PI: Geller (Johns Hopkins University)

Role: Investigator, 5% Effort

The goal of this P20 is to study the ethical, legal, social and policy (ELSP) issues arising in the novel and timely context of infectious disease. The P20 would be the first to map this terrain, and prepare for a Center to analyze relevant ELSP issues and make policy recommendations for addressing them. My role was to assist with the design and conception of aims related to social media and public perceptions of GUIDE.

NIH

Total Direct Cost: N/A

PIs: Sugarman (Johns Hopkins University), Weinfurt (Duke University)

Role: Investigator, 8% Effort

The overall goal of this project from the Ethics/Regulatory Core is to improve understanding of when and how different stakeholders believe research testing or comparing interventions that are each considered standard of care are acceptable and when traditional or modified approaches to consent for it should be sought. As an investigator I helped design and conduct semi-structured interviews to elicit physicians' views of pragmatic clinical trials and co-authored the publication that resulted from these findings.
