Research Projects and Grants

2019-2020 **Co-Investigator**
American Registry for Migraine Research (ARMR)
Multicenter, prospective longitudinal patient registry, biorepository, and neuroimaging repository
Sponsor: American Migraine Foundation
Aim: To better understand the causes, characteristics, and management of migraine and other headache disorders
University of Colorado School of Medicine, Department of Neurology

2019-2020 **Co-Investigator**
Medication Overuse Treatment Strategy (MOTS)
Multicenter, randomized PCORI trial
Sponsor: PCORI
Aim: To determine whether switching or limiting the frequency of the overused medication was noninferior to continuing using the overused medication the same amount, both strategies implying starting or optimizing the preventive treatment
University of Colorado School of Medicine, Department of Neurology

2019-2020 **Co-Investigator**
Effects of Intravenous Eptinezumab vs Placebo on Headache Pain and Most Bothersome Symptom When Initiated During a Migraine Attack (RELIEF)
Phase 3b Multicenter, randomized, double-blind, placebo-controlled clinical trial
Sponsor: Lundbeck
Aim: to evaluate eptinezumab in the acute migraine setting for headache pain freedom and absence of most bothersome symptom
University of Colorado School of Medicine, Department of Neurology

2020-2021

Principal Investigator

Vega

Sponsor: Eli Lilly

Aim: To evaluate satisfaction with healthcare provider report from a migraine smartphone app

University of Colorado School of Medicine, Department of Neurology
